The trial of Robert Des Anges, Expeputy Collector of Customs, for conspiracy to defraud the Government of revenue by smuggling silks at an under valuation, was concluded yesterday. The jury, after ten minutes' absence, rendered a verdict of guilty. The prisoner was remanded for sentence. A motion for arrest of judgment will be argued on Saturday.

The latest advices from Havana state that the total number of Cubans put in the prisons, in and around Havana and sent to the Isle of Pine, amounts to 700. It is surmised that the Government has done this as a dodge to effect a wholesale blackmail practice, all the prisoners being men of wealth, or at least able to pay a ransom of \$2,000 or \$3,000 apiece, ine Government thus realizing hearly one million dollara. Besides the Mr. F. Montes, already published as an American citizen, and sent to said Island, it is also announced that two brothers, natives, named Pedro and Jose Z. Quintain, American citizens, have been sent there without the semblance of cause or trial. It is further said that recruits are being taken in the city of New York by secret agents in the city of New York by secret agents in the service of the Spanish Government, from among the most indigent of our foreign population—Halians, Irish, Poles, and other European untionaities—at the rate of \$100 in gold, and the promise-of land-grante of fitty acres at the close of the war in Cuba, They go for the term of one year from the date of being mustered into the army. These recruits, after being engaged, are kept in sailor bosrding-houses near the battery, and every steamer for Havana carries a small squad of them, to avoid notoriety.

Mr. Marshall, First Assistant Postmaster General, claims that the outery against the present mode of compensating Postmasters is not justifiable by facts. Under the old law the compensation of Postmasters was adjusted on a basis of stamps, canceled by the Postmasters, the number of which was fixed by a sworn statement of these officers, with no check upon it to prove its accuracy beyond the oath of Postmasters. Under the present law the compensation is based upon the amount of stamps actually purchased, so that the only oparticular in the control of the present law the compensation is based upon the amount of stamps actually purchased, so that the only opactually purchased, so that the only op-portunity for fraud is in sales outside of the delivery of the office. Under the old law there was no ex-

posure, because there was no induce-ment to any one to make disclosures,

ment to any one to make disclosures, while under the present law the moment a man goes outside of his boundary he treads upon his neighbor's toes, and they are not slow to discover it and make a complaint. Hence the very general outery against the present system. A short time since a Virginia postmaster was reported for improper use of stamps, and an investigation showed that the charges were well founded. A good business had been done by him in that line. Notwithstanding all this, his compensation for the past year was but \$692 50 against \$750 under the old system. A large number of cases show so large a difference between the present compendifference between the present compen-sation and the old allowance as to leave painful suspicions that the returns of stamps canceled were much higher than warranted by the actual facts.

To this class, this year, were issued by the Infirmary Directors, through their agents, the overseers, food, grossries, coal, etc., on 21,000 orders, which orders are signed by the proper authority before being presented by these seeking relief. In 1966 they were allowed \$110,300, and had but 250 Infirmary, patients. Since that time seventees wards have been added, and the inmates to-day number 579. The charge of extravagance on the part of the Infirmary managers can not be brought. By an examination of their accounts it will be seen that the payroll is less now than for five years past. Not an employe of the institution, asset the engineer, receives more than \$30 a month. And they are now in debt to those employes \$5,760, who have not received a cent of wages since October, 1874.

Many of the inmates are themselves doing duty as nurses, the building being so full that even the chapel has been given up for a ward. All the groceries and other necessaries are purchased at wholesale and at the lowest possible

The Infirmary has a debt of \$20,000, which has been hanging over it for years. The Infirmary proper may be able to weather it through, as they have a running contract, but the 2,000 outside poor, which they, up to this time, have been literally keeping from starvation, what about them?
